

Certificate of entry

„Joining forces to save the climate and the Amazon rainforests“

The Private and Social Enterprises for Climate Alliance Austria program

The private enterprise *BG Graspöintner GmbH & Co KG*
enters into Climate Alliance Austria.
30 April 2014

Climate Alliance is a global network committed to the protection of the world's climate. Currently, more than 1600 municipalities in 20 European countries are joining forces with indigenous peoples in South America to reduce the greenhouse gas emissions in Europe and to protect the Amazon rainforests.

The Austrian section of Climate Alliance – Climate Alliance Austria – involves municipalities, schools and kindergartens as well as private and social enterprises.

In joining Climate Alliance Austria, we make a commitment to the following principles:

- We have our enterprise's policies regularly checked by experts of Climate Alliance Austria.
- In cooperation with Climate Alliance Austria, we define the goals that we strive to reach in the fields of energy, mobility and procurement.
- We pursue the systematic implementation of climate protection measures.
- Within a period of two to five years we have our enterprise's policies evaluated.

The Private and social enterprises for Climate Alliance Austria program is funded by the Austrian Federal Ministry of Agriculture, Forestry, Environment and Water Management. Membership is valid for eight years from the enterprise's date of entry. After that period the member enterprise is free to have itself evaluated again and to commit itself to new goals.
